SKILLS

Expertise: HTML5 | CSS3 | JavaScript ES6 | Bootstrap | React Bootstrap | TailwindCSS | DaisyUI | Flowbite | React.js | React Router | Git and GitHub | Firebase Authentication

Comfortable: Node and Express.js | Rest API | Devtool and Debugging | MongoDB | Material UI | React Query | Axios | Global State Management | JWT | React Hook Form

Familiar: Redux | Styled Component | Srtipe | SSL Commerz | Date fns | TypeScript | Next.js

Tools: MacOS | Windows | VS Code | Netlify | Vercel | Firebase | Dotenv | Figma | Chrome Dev Tools | Canva

PROJECTS

Laptop Utopia (A laptop resell website)

[Server Site GitHub](#) | [Client Site GitHub](#) | [Live Website](#)

Technologies used: React.js, TailwindCSS, DaisyUI, Firebase Authentication, Express, MongoDB, Stripe Payment, etc.

- ❖ Online booking for reselling laptops with three user roles buyer, seller, and admin. Buyers, sellers, and admin are controlled with a private route, specific user route, and JWT token
- ❖ Buyers can order and report products. Sellers can add, delete and advertise their products. Admin can see sellers, buyers, and reported items. Admin also can delete any of them and can verify a seller
- ❖ The website is responsive for mobile, laptop, and desktop. All the generated data is integrated with the backend. Stripe payment method implemented in this project for buying a product

Task Controller (Task management website)

[Server Site GitHub](#) | [Client Site GitHub](#) | [Live Website](#)

Technologies used: React.js, TailwindCSS, Flowbite, Firebase Authentication, Express.js, MongoDB, etc.

- ❖ From the Add Task page, the user can add a task. After adding it will appear on the My Task page. User can attach an image if the user wants, which will show up on the All Media page. Dark mode integrated into this website
- ❖ On the My Task page, the user can update, delete, and edit tasks. If the task is done, the user can press the complete button to make it complete
- ❖ The completed task will appear on the Completed Task page. Here user can reassign as well as delete the task. Logged-in users can also leave a comment for every task. Users can update their profile

Photo Bizz (A service provider's website)

[Server Site GitHub](#) | [Client Site GitHub](#) | [Live Website](#)

Technologies used: React.js, TailwindCSS, DaisyUI, Firebase Authentication, Express.js, MongoDB, etc.

- ❖ Only three services appear on the home page. By clicking the 'see all' button user can see all the services
- ❖ Then clicking the 'service details' button user can see the details of the product and comments of every user
- ❖ Logged-in users can leave a review for every service and can see his/her own review on the 'my review' page and can edit or delete reviews. Fully responsive to mobile, tablet, and laptop. Data stored and integrated from MongoDB

Complete React Guideline (learning website)

[Server Site GitHub](#) | [Client Site GitHub](#) | [Live Website](#)

Technologies used: React.js, React Router, React Bootstrap, Firebase Authentication, Express.js, etc.

- ❖ An online tutorial website where react routing system is the main focus. On the tutorial page user can check the tutorial details by clicking both the side link and the tutorial card
- ❖ Tutorial details can be downloaded as pdf from the tutorial details page. There is a checkout button to know further details

COURSES AND ACHIEVEMENTS

- ❖ Jul-2022 - Dec-2022 | Programming Hero | Complete Web Development Course With Jhankar Mahub (Batch-6)
- ❖ 1 Jul 2022 | Udemy | [Certificate Link](#) | The Git & GitHub Bootcamp Instructors Colt Steele
- ❖ Aug 2019 - Oct 2021 | Junior Officer (R & D) | PICARD Bangladesh Ltd.

LANGUAGE PROFICIENCY

Fluent in Bengali, full working knowledge of English, and a good understanding of Hindi
